To whom it may concern,

Direct Energy Consulting, as a Partner of "Project Evolve", recently installed an Enterprise Central Building Automation, Control and Reporting System at the University of Calgary. This project demanded the highest degree of cooperation between DEC's technical installation, and commissioning, crew and the University of Calgary's Information Technology Department to ensure inter-operability of the various system components.

Corey Kaye, on behalf of the University, quickly, and willingly, assumed the lead role in this joint coordination effort and became responsible for bringing the project to a successful conclusion.

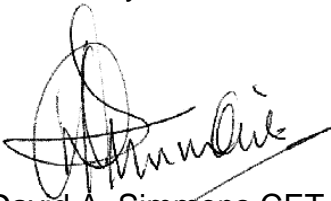

We found Corey to be totally professional, in his approach to solving the numerous networking issues, and he demonstrated a high degree of competency when completing the tasks in hand.

Corey also has excellent communication, and technical skills, and it was our pleasure to have worked with him on this project.

We know that Corey will be successful in any future endeavor and we would not hesitate to recommend him to those seeking an enthusiastic and personable information technology information expert to join their team.

If you require any further information then please do not hesitate to contact me.

Yours truly,

David A. Simmons CET.,  
Manager, Energy Group,  
Direct Energy Consulting.
